Recall #: 91TV | REARVIEW CAMERA SOFTWARE Recall Date: 2026 Jul 28

Recall Description

Under certain circumstances, a vehicle may experience a low-voltage electrical event that can cause camera images, including the rearview camera image, to not appear on the display screen as intended. A rearview camera with a deactivated image can reduce the information available to the driver of what is behind the vehicle, increasing the risk of a crash or injury to people outside the vehicle..If the recall condition is present in the vehicle, the driver may notice that there is no rearview image displayed after engaging the reverse gear. Should this occur, owners are advised to use extra caution when reversing, and to contact an authorized dealer to have the vehicle diagnosed.

Remedy

Update rearview camera software.
