Recall #: WTW-82 | Combination Meter Reprogramming Recall Date: 2018 Nov 01

Recall Description

On certain vehicles the low fuel warning light may not turn on at the correct time to warn of a low fuel level. The driving range indicator in the multi-information display may also indicate a remaining distance-to-empty when the fuel tank is empty. While the low fuel warning light will eventually turn on and the fuel gauge will eventually display ""EMPTY"" if the driver continues to operate the vehicle based on the range indicator the vehicle may run out of fuel.

Remedy

Dealers will reprogram the combination meter (gauge cluster) software. Note: Until the recall repair is completed drivers should ensure to refill the fuel tank before the fuel level is close to empty.
