Recall #: WRE-21 | Ignition Coil Replacement Recall Date: 2021 Apr 15

Recall Description

On certain vehicles the engine control module (ECM) may have been programmed incorrectly. As a result the internal temperature of the ignition coils may increase. This could cause a short circuit and a blown fuse. This may result in a sudden loss of engine power with an inability to immediately restart. Note: This recall replaces WUQ-02 (Transport Canada recall 2019-526). Vehicles that were repaired under that recall also require this repair.

Remedy

Subaru will notify owners by mail and instruct you to take your vehicle to a dealer to reprogram the ECM if necessary and replace the ignition coils. On vehicles with ignition coil damage if a certain trouble code (DTC) is stored the front exhaust pipe will also be replaced.

Recall #: WRD-21 | Rear Stabilizer Bracket Bolts Recall Date: 2021 Apr 15

Recall Description

On certain vehicles the bolts for the rear stabilizer bracket could loosen over time. This may cause a rattling notice from the rear of the vehicle. If you continue to drive with this problem the bolts could detach. If this happens vehicle stability could be reduced.

Remedy

Subaru will notify owners by mail and instruct you to take your vehicle to a dealer to inspect the condition of the bolts on the rear stabilizer bracket and tighten them if necessary. If a bolt is missing the dealer will install a new bolt.
