Recall #: R0179 | Transmission Control Module Reprogramming Recall Date: 2021 Jan 11

Recall Description

Environment Canada Recall ECR H0003 21-001 Some 2020 model year Hyundai Elantra vehicles equipped with Intelligent Variable Transmissions (IVTs) have an issue where slip occurs between power transmission devices (pulley / belt) within the IVT. Dealers will reprogram the transmission control module, and, if necessary, replace the transmission.

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been closed, please contact HYUNDAI or visit [Hyundai's website](https://recall.hyundaicanada.com/). (https://recall.hyundaicanada.com/)

Recall #: R0189 | Piston Rings Recall Date: 2021 Aug 30

Recall Description

Issue: On certain vehicles, the engine's piston oil rings may be defective. This can cause engine wear that can lead to increased oil consumption. Eventually, this can create abnormal engine noise and the oil pressure warning light may turn on. If you continue to drive the vehicle with these symptoms, the engine could fail. Note: This only affects vehicles equipped with a 2.0 L Nu MPI engine. Safety Risk: A sudden loss of engine power could increase the risk of a crash. An engine failure could also create the risk of a fire. Corrective Actions: Hyundai will notify owners by mail and instruct you to take your vehicle to a dealer to inspect the engine. The engine will be replaced, if necessary.

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been closed, please contact HYUNDAI or visit [Hyundai's website](https://recall.hyundaicanada.com/). (https://recall.hyundaicanada.com/)
